Sedus talk about

There is no magic about speed.
Sedus talk about responds to the
most diverse requirements with
short reconfiguration times, which
combine two systems in one go:
folding, individual table legs can be
fixed into place with a simple turn,
while the T-leg folds down even
faster. Both variants can be linked
with sectors and interconnecting
tops without the need for tools and
with no tedious tightening of screws.

Individual tables and interconnecting tops

Square, rectangular and trapezoidal individual tops and additional sectors can be combined to create the most diverse range of configurations. Tailored to the room layout, the number of participants and the communication demands, the required table arrangement can be configured quickly and without the need for tools. The rectangular tables with a folding column leg frame can also be linked up, providing greater flexibility and optimal leg space.
