se:mission

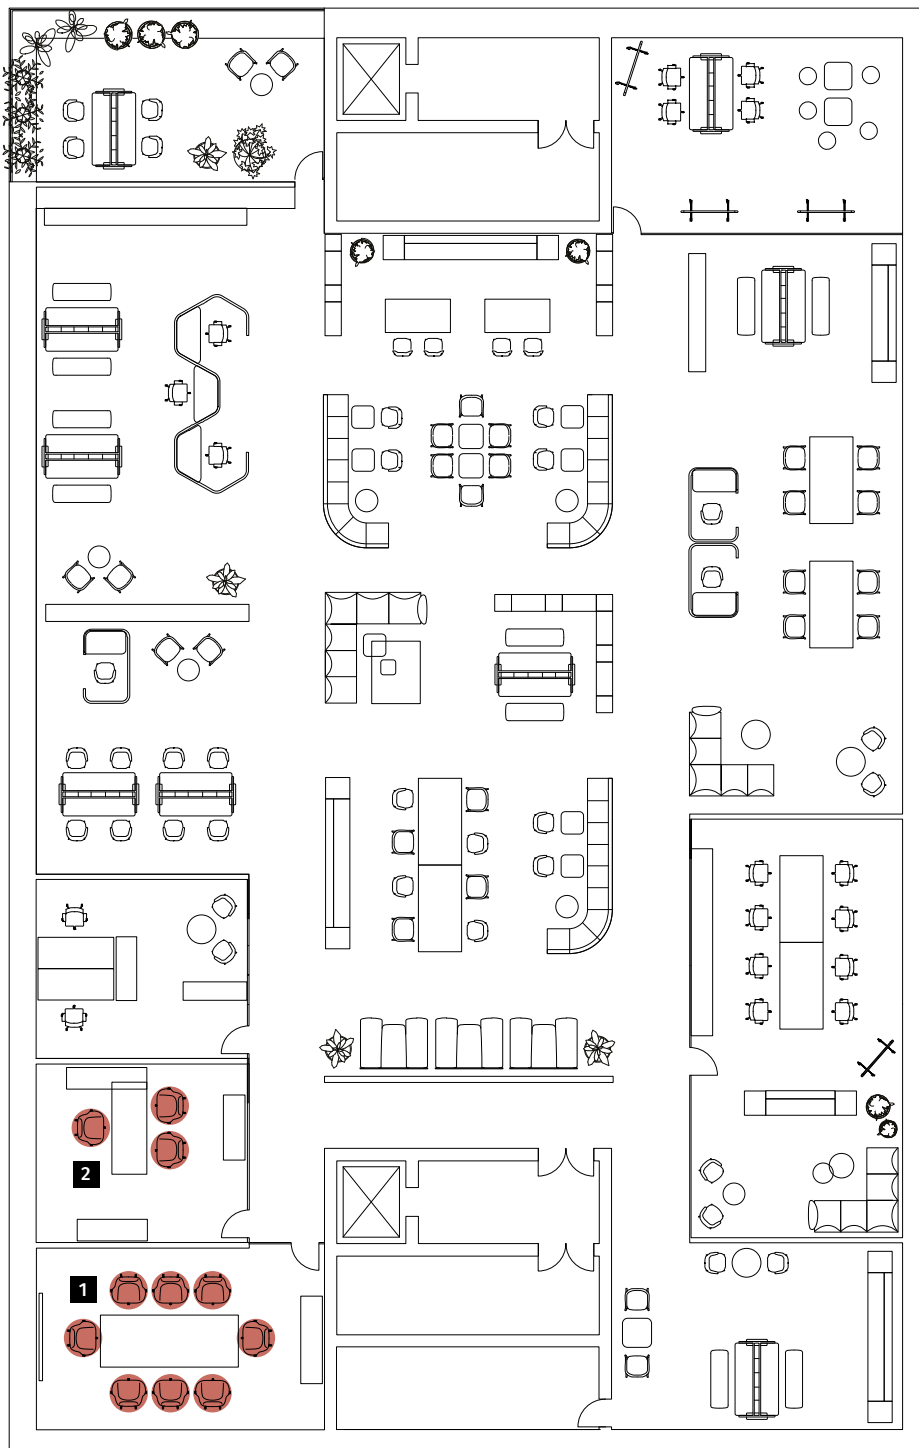

Premium elegance for the highest demands

With se:mission, Sedus is expanding its executive portfolio to include a conference swivel chair that unites functionality, design and individualisation to perfection. In doing so, se:mission responds to the increased requirements of modern management cultures – whether for classic management or new leadership. The clear design language, paired with excellent workmanship and attention to detail, gives se:mission an aura of value that is indispensable in the executive sector. It impresses with an inviting gesture and its extraordinary variety of designs: different backrest heights, various material options and colour variants as well as flexible frame shapes make customisation possible, embodying both classic elegance and modern lightness. Smart details such as DuoMotion technology, which ensures ideal seating ergonomics, make se:mission a real all-rounder. Whether in board rooms, conference rooms or as a manager's workstation – se:mission creates a representative and comfortable working environment.

Application areas

- 1** Meeting & conference rooms
- 2** Management workstations

Board rooms

se:mission

● se:mission

The fully upholstered conference chair se:mission impresses through its inviting shape and high-quality workmanship. Numerous individual design options allow for a wide variety of styles – for board rooms, conference rooms and management workstations.

se:mission

Comfortable conference chair as the perfect host

se:mission is an impressive conference chair with a broad range of applications. It offers creative freedom for consistent office design and can be individually configured according to style and requirements. With its distinctive character and high-quality craftsmanship, the chair enhances any working environment. The inviting design, intuitive functionality, and ergonomic features ensure productive meetings, even when sitting for long periods of time.

Advantages

- The chair is suitable for many different applications.
- The integrated armrests provide a sense of security.
- The conference chair is inviting.

Features

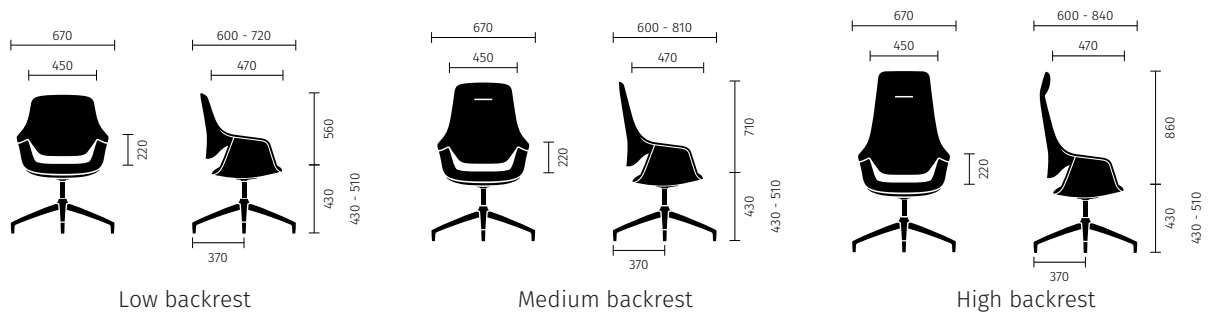

- The proportion of recycled material in the non-visible plastic parts is 100% (post-consumer recycled material).
- The DuoMotion seating concept: The interaction of the rocking mechanism and the flexible backrest creates the DuoMotion concept, which provides an extremely comfortable sitting experience. The interaction of both components creates a movement sequence that seems synchronous.
- The seat surface has generously designed proportions.
- The frame on gliders has only four delicate and narrow star base legs.
- The seat has a pocket sprung core.
- Backrest locking (inclination) is possible.

Options/accessories

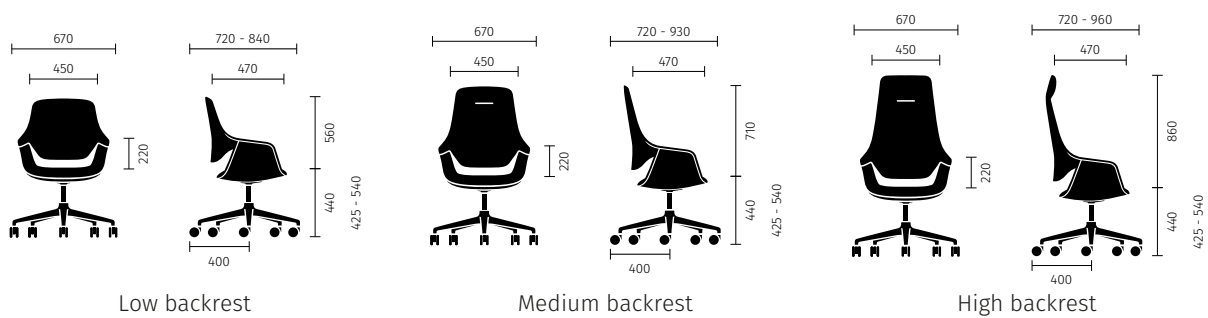

- The following backrest options are available: low, medium and high.
- Two base frames are available: 4-star with glides and 5-star with castors.
- The following options are available for seat height adjustment: central, not height-adjustable seat suspension, upright column with automatic return (only in combination with castors/glides version), height-adjustable gas spring (seat height 4-star base with glides: 435-525 mm, 5-star base with castors: 425-540 mm) .
- Design castors can be selected as an option (5-star base on castors).
- Seating covers are available in Sedus upholstery fabrics, leather and imitation leather. Covers can be customised for seat cushions, inner and outer backrest upholstery and trims.
- Colour combinations are possible within a fabric collection. Leather and imitation leather can be combined with each other and with all fabric collections.

se:mission is sustainable.

Social responsibility

- It is an ergonomic product.
- Combination options are available for all products.

Economy

- se:mission has been tested for a 15-year durability period according to Sedus quality standards.

Ecology

- The proportion of recycled material in the non-visible plastic parts is 100% (post-consumer recycled material).

Sedus pursues a holistic approach to sustainability based on the three pillars of social, ecology and economy. The goal of becoming CO₂-neutral at its administrative and production sites by 2025 is actively supported through the development of innovative products and efficient production methods. Sedus is also committed to social projects, education and health through two foundations to which the company is majority-owned, thus making a positive contribution to society. With the “Sedustainable” initiative, Sedus designs holistic workplace solutions that both protect the planet and improve the quality of life of its employees. We really care.

We really care

Designed, engineered, crafted **in Germany. Since 1871.**
