

LIN TAPIZ is an innovative system of multiple seats, designed to inhabit high-traffic indoor public spaces. With a refined and timeless design, the collection is completely modular and allows multiple configurations to be created.

The structure and arms are entirely made of aluminum alloy, a sustainable material which allows the creation of resistant and light benches, with minimal maintenance and 100% recyclable. Using intermediate legs and connection tables, the system allows the creation of benches with different shapes and infinite length. The combination of aluminum and upholstery allows the creation of benches with high performance that are at the same time comfortable, welcoming and provide warmth to the spaces where they are located.
