

TABLE

Quinti®

DIMENSIONS

Cylinder diameter 60 cm. / Height 74 cm. / Top diameter 120 cm.
Cylinder diameter 40 cm. / Height 74 cm. / Top diameter 70 cm.

BASE

The base is made of 2 mm thick sheet metal, machined with a calendaring machine to take on a cylindrical shape. Inside the cylinder are laser-cut metal plates; the upper plate has the attachments for the top, while the lower plate has the housings for the feet.

The plates welded inside the base also have the function of stiffening the cylindrical sheet metal.

The floor feet are adjustable in height and are positioned so that all screwed together still leave the cylinder a few millimeters off the ground.

The metal is painted with epoxy powders in white or black colors or in all Quinti colors.

TABLE

TOP

The top is made of 3 mm thick sheet metal, machined with a laser cutting machine to take on a circular shape. Then painted in colors as a base.

At the bottom of the plane, a laser-cut counterplate is welded for attachment to the cylinder plate.

Disassembly

All products have been designed in such a way as to allow them to be disassembled at the end of their useful life, so that their parts and components can be reused, recycled, or recovered for energy purposes.

Warranty and Safety

QUINTI guarantees that the products will retain their characteristics for 6 years from delivery, except for normal wear and tear and provided that they are used in accordance with the instructions provided. QUINTI will replace any product found not to comply with this warranty at no cost, without incurring any other liability whatsoever. The warranty does not apply to components, external accessories, or materials supplied by the buyer and applied to the products for the purpose of customizing them. For optimal maintenance of the products and to preserve the characteristics of the materials with which they are made, a few simple precautions are necessary.

All chairs offered are SAFE in accordance with EU Regulations 2023/988 on general product safety (GPSR), reinforced by UNI EN certifications.

The company shall not be held liable if the product is used improperly (standing on it or using it as a ladder, or swinging it in a way that could compromise its functioning and the user's safety). To lift or move the product, grasp it firmly by the supporting structure. The product must not be subjected to off-center loads; it is designed to be used under normal conditions, resting on its four legs or base.

Usage and Care

For optimal maintenance of the products and to preserve the characteristics of the materials they are made of, a few simple precautions are necessary.

METALS

Cleaning: both steel and aluminum metal surfaces, should be cleaned with a soft damp cloth soaked in warm water. For stubborn stains, you can dilute a small amount of mild liquid soap in water. Always dry after cleaning with a soft cloth or chamois leather. Do not use creams or pastes to clean steel, do not use chlorine, bleach, or other aggressive detergents. Do not use abrasive pastes, scouring pads, or abrasive sponges, as they may scratch metal surfaces.

Use: be careful with food stains such as coffee, cola, and fruit juice, which can leave permanent stains on surfaces.

WOODS

Cleaning: clean with a soft, damp cloth soaked in warm water. Always dry after cleaning. Immediately remove any liquids or other residues to prevent absorption.

Use: wood surfaced, being a natural material, may undergo color changes over time with use and exposure to light. Please note that wood cannot withstand direct heat sources on its surface.
