

PEDRALI®

TEMPS 3766

DESIGN:
JORGE PENSI DESIGN STUDIO

The Temps Low Back task chair is characterised by a lower backrest and designed to fit both in office meeting rooms and domestic settings. Has a striking feature in its height-adjustable base made in die-cast aluminium, pure and elegant. Thanks to its weight-activated, synchro-tilt mechanism that is able to regulate the degree of tilting autonomously according to the user's body weight, this seat ensures ergonomics and comfort.

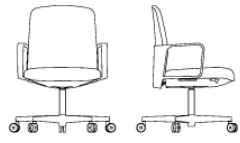

An injection-moulded polypropylene shell fits around the seat and contains a mechanism that embraces the user's lower back ensuring ergonomics and comfort, while the padding inserted in the polypropylene shell designs a continuous line.
