
Designed by Roberto Baciocchi, Ginevra is an extremely elegant and versatile chair. It can be used in a variety of environments such as restaurants, hotels, luxury homes and waiting rooms.

All the versions can also be upholstered with Rubelli velvet and Eritage leather.

No matter the finish, Ginevra always stands out as a very elegant and high quality product.

Versions

Chair \ Armchair with four legs

Armchair with 4 spoke base and swiveling plate

Couch

Bench

Seat & back

Both the seat and the back feature an inner structure made of metal. Elastic bands and variable density foam rubber make Ginevra extremely comfortable.

Finitura struttura

The legs are entirely made of metal (diam. 20 mm.) and can be nickel plated, finished in Maserati brown or golden.

The 4 spoke base features cone shake spokes and is entirely made of metal.

Usage & care

In order to maintain Quinti products in perfect conditions through time and obtain a long lasting quality of the raw materials we hereby recommend to follow some very basic care instructions.

FABRICS

- Cleaning: see the dedicated selection written on the color Swatch card.
- Usage: we recommend a particular care as fabrics can be easily cut or ripped.

LEATHER

- Cleaning: Clean with a soft cloth with water. We remind that leather is extremely delicate. We recommend to use high quality products and to follow the instructions of the manufacturer. In case of doubts, we recommend to test the product on a hidden part and to wait at least 24 hours should any problem arise.
- Usage: It is very important to look carefully at the wash suggested and to pay particular attention while using.

PLASTIC MATERIALS

- Cleaning: plastic surfaces usually need to be cleaned with a cloth and water. We recommend not to use dry cloths that might generate an electrostatic charge that will capture dust. For the most persistent stains a small amount of liquid soap diluted in water may be used.

WOOD

- Cleaning: plywood surfaces need to be cleaned with a cloth and water. We recommend to dry immediately after the cleaning process. All liquids or other residue must be removed in order to avoid the absorption of the same.
- Usage: being plywood a natural material you might notice an alteration of the color shade during time and use. We also remind that plywood cannot bear with warm surfaces or high temperatures if placed directly on the wooden top.

METALS

- Cleaning: plastic surfaces usually need to be cleaned with a cloth and water. For the most persistent stains a small amount of liquid soap diluted in water may be used. We always recommend to try immediately after the cleaning process by using a soft cloth or a leather one. Never use cleaning products for steel, chlorine, bleach or other strong detergents. Avoid abrasive creams, score pads and abrasive sponges that can scratch the metal surfaces.
- Usage: mind the stains of food such as coffee, juices, coke, if not removed immediately they might leave indelible marks on the surface.

WARRANTY

all the products are covered by a 5 years warranty. For the first 24 months: free repair of any flaw due to the production processes; from 24 to 60 months: working hours and carriage costs will be charged to the client. The warranty for the mechanisms is 12 months.

The warranty is not valid if:

- Damages and deterioration are due to the normal wear and tear.
- Damages and deterioration are due to an incorrect use.
- Deterioration caused by an inappropriate care of the materials.
- In case of use for more than 8 hours the warranty is valid only for 24 months.
