*Swivel chair
in modular design*

Who we are and what we do

Sedus Stoll AG was founded in 1871 and is one of the leading European manufacturers of office solutions. The product range includes seating furniture, such as swivel and visitor chairs, as well as office, conference and contract furniture – all “Made in Germany”.

The company headquarters is located in Dogern on the High Rhine in southern Germany. Another production site is in Geseke, North Rhine-Westphalia. Sedus is a company with a long tradition and 150 years of company history that has repeatedly set standards – in terms of ergonomics, manufacturing processes and sustainability. As a synonym for innovation, technology and aesthetics, Sedus constantly enriches the “office world” with new product ideas and contemporary concepts. Sedus puts a strong focus on current trends and changes in the world of work. New organisational structures and forms of work require flexible, aesthetic furnishings and custom-made solutions that enhance collaboration, communication and movement. A particular emphasis is placed on the health and well-being of the users.

With our solutions, we support people in expressing their genius at work.

Why se:kit?

Agile workspaces, different users, defined budgets – se:kit can be perfectly configured to suit **everyone** and **everything**

Intelligent backrest concept
due to further development of the time-tested dorsokinetics

Sustainable design:
Convinces with both high recycling content and excellent recyclability

Comfortable, cosy and individual? → **se:kit** is the answer

Made to measure and according to the standard
se:kit with Type A meets the highest EU standard for adjustable office work chairs

Mix & Match

Home office

A PERFECT FIT FOR EVERYONE

The swivel chair of your dreams

Regardless of how and where work is done – the working environments, tasks and needs can be quite different. Consequently, the requirements placed on the features to create the perfect office chair also vary. Just how practical, then, would a swivel chair be that could satisfy everyone's wishes?

The new se:kit takes a special approach, as it follows a modular concept and focuses on comfort. The user decides how they would like the swivel chair to be configured and which components they would like to have – freely, based on the motto “less is more” or, sometimes, “more is more”. What the chair always comes with, however, is seating with the best comfort. And all that without compromising on design and aesthetics.

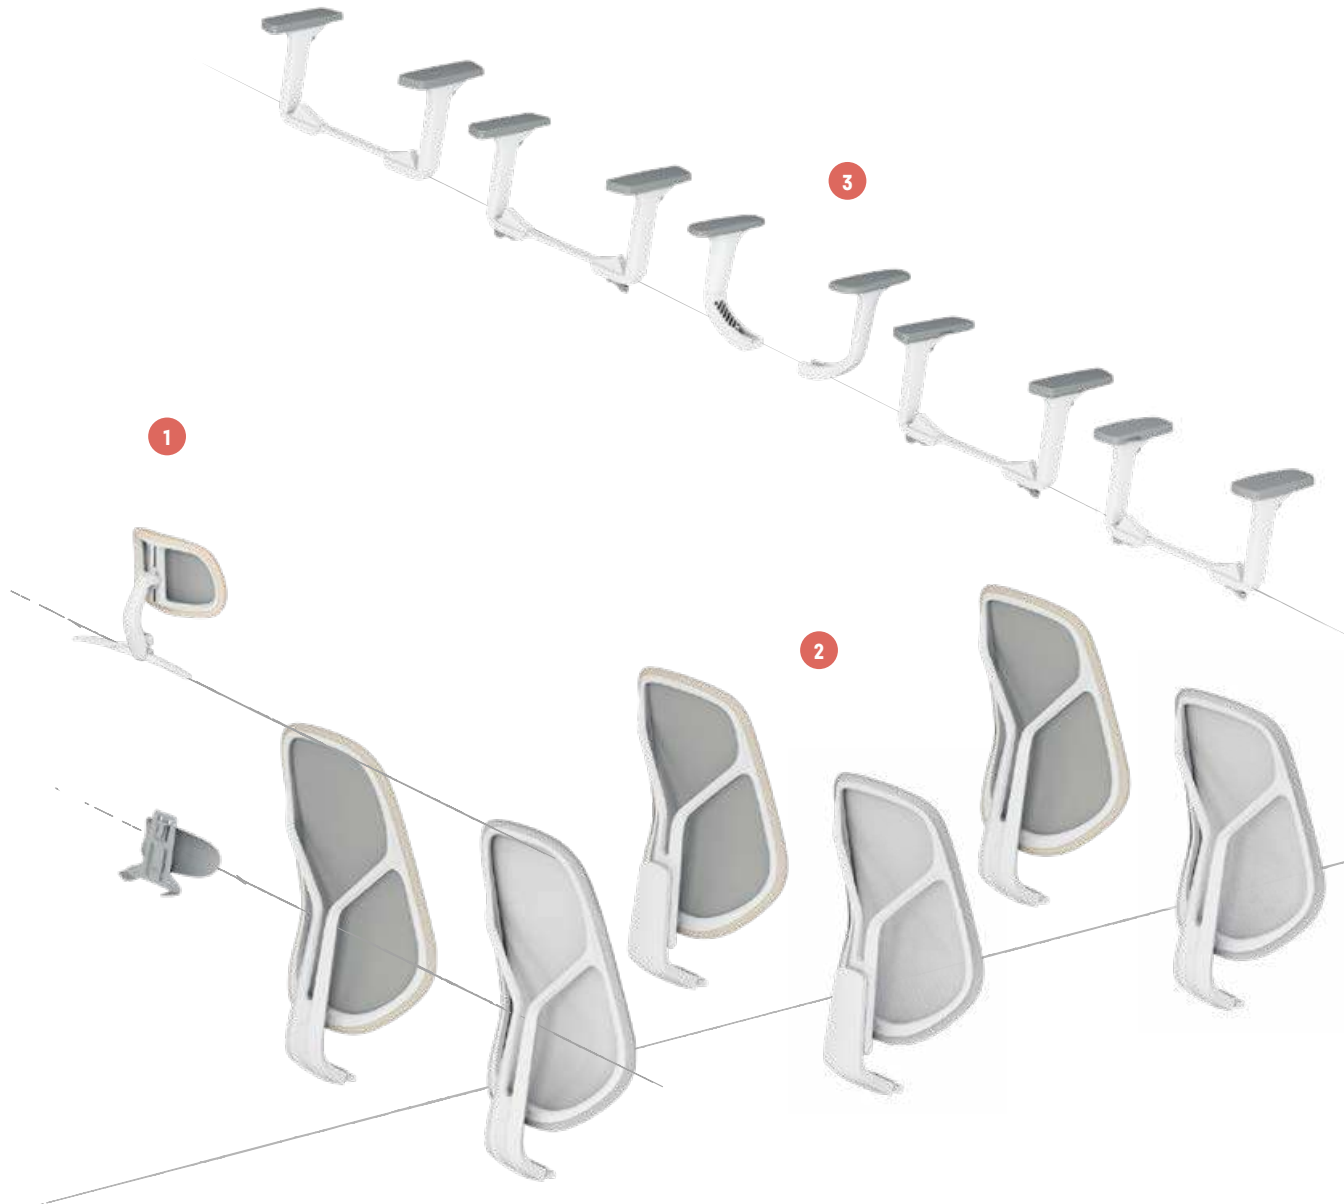

Examples of use

- Conference and meeting rooms (1)
- Bench workplaces (2)
- Desk-sharing team workstations (3)
- Single workstations (4)
- Home office

At a glance

se:kit can be configured just the way you want it: with modular elements that can be easily connected, most of them without using any tools.

1 Accessories

- Neck support & coat hanger also available separately
- Lumbar support

2 Backrest

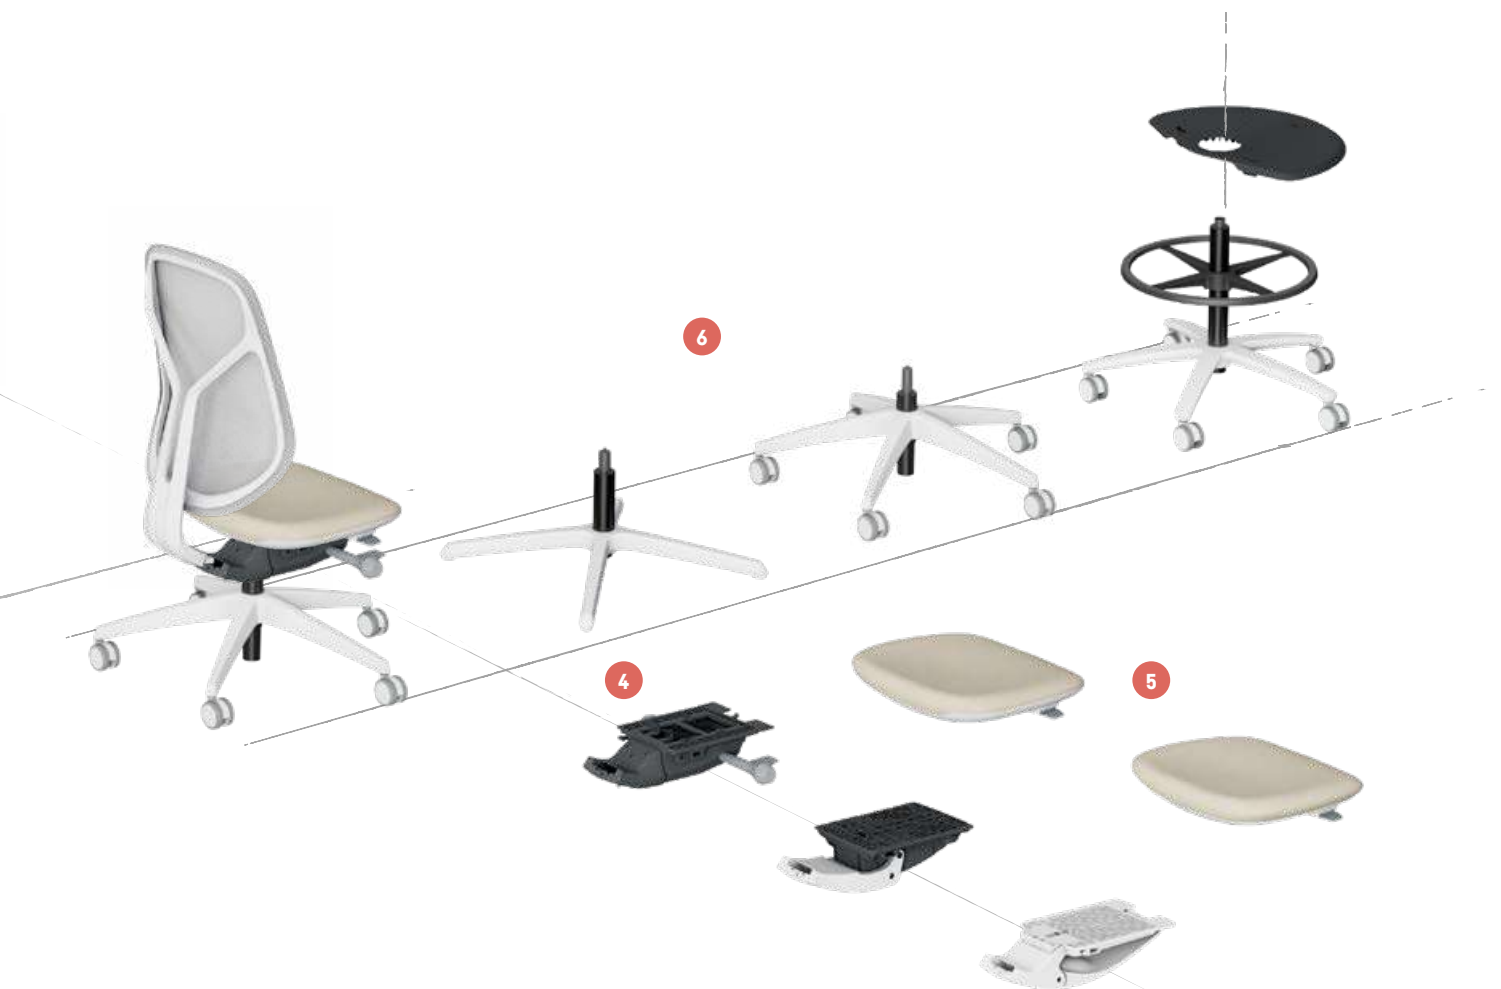

- With full upholstery (high, height-adjustable, medium)
- With membrane (high, height-adjustable, medium)

3 Armrests

- 1D armrests
- 2D armrests
- 2D design armrests
- 3D armrests
- 4D armrests

Sustainable through and through: se:kit stands out with its high recycling content and excellent recyclability due to its removable and interchangeable components.

4 Mechanism

- "Similar" mechanism with individual weight adjustment
- "Similar" mechanism with automatic weight adjustment
- "Kinetic Swing" mechanism

5 Seat

- Standard seat (with or without 7-cm seat depth adjustment and auto return)
- Comfort seat (with or without 7-cm seat depth adjustment and auto return)

6 Base

- 4-star base (conference)
- 5-star base (counter) – optionally with footrest
- 5-star base

Countless design options

What kind of user will the swivel chair be suitable for? And in which area of work will it be used? Are you looking for a chair that requires little or no operation effort at all, or a chair that can be adjusted individually? Due to its modular concept, se:kit offers a greater variety of configuration options. From the neck support to the castors, from the membrane colour or the full upholstery to the mechanism – nearly all components can be individually selected and put together to create the swivel chair of your dreams.

Sample configurations

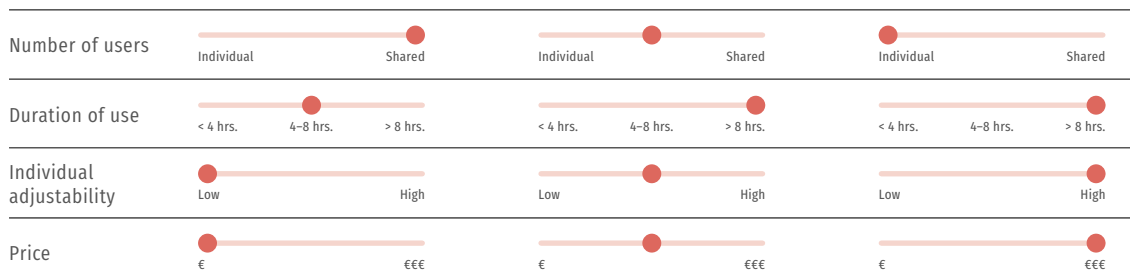

Light & flexible
“Just sitting comfortably, with no bells and whistles”

Comfortable & versatile
“Comfortable sitting for everyone”

Individual & representative
“Perfect individual adjustment”

Ideal for short-term work and temporary workplaces with frequently changing users, e.g. for collaboration on a bench

- The example shows:
- “Kinetic Swing” mechanism
 - Standard seat
 - Backrest: 63 cm membrane
 - 2D design armrests

Ideal for multi-user workstations where users work for long periods of time in a concentrated setting, e.g. at team workstations in a desk-sharing model

- The example shows:
- “Similar” mechanism with weight adjustment
 - Comfort seat
 - Backrest: fully upholstered, 63 cm with lumbar support
 - 3D armrests

Ideal for permanently assigned workstations where users work for long periods of time in a concentrated setting, e.g. at individual workstations, in home offices or management offices

- The example shows:
- “Similar” mechanism with individual weight adjustment
 - Comfort seat
 - Backrest: height-adjustable membrane
 - 4D armrests
 - Neck support

MECHANISM

Light & flexible

- “Kinetic Swing” mechanism
- Autom. seat tilt of up to 5°
 - Lockable in the upright position
 - Opening angle: 23°
 - Ideal for meeting rooms

Comfortable & versatile

- “Similar” mechanism with weight adjustment
- Autom. seat tilt of up to 5°
 - Lockable in the upright position
 - Opening angle: 0, 8, 16, 26°
 - Ideal for desk-sharing workstations

Individual & representative

- “Similar” mechanism with individual weight adjustment
- With/without seat tilt adjustment of up to 5°
 - Lockable in 3 positions
 - Opening angle: 26°
 - Ideal for permanently assigned workstations

The examples on the left will help you to choose the right type of mechanism

SEAT

Standard seat

Without seat depth adjustment

With 7 cm seat depth adjustment and auto return

Comfort seat

Without seat depth adjustment

With 7 cm seat depth adjustment and auto return

Comfort seat: even more spacious and comfortable than the standard seat, ideal for users with greater weight

BACKREST

Membrane (airy, visually light)

Full upholstery (even more comfortable)

ARMRESTS

None

1D armrests

- Adjustable height

2D armrests

- Adjustable height and width

2D design armrests

- Adjustable height
- Movable pad (back/forth)

3D armrests

- Adjustable height and width
- Movable pad (back/forth)

4D armrests

- Adjustable height and width
- Movable pad (back/forth, right/left and rotates 360°)

BASE

5-star base

Standard gas spring

Sedo-lift III

4-star base (conference)

Standard gas spring

Sedo-lift III

5-star base counter

Standard gas spring

ACCESSORIES

Neck support & coat hanger*

Lumbar support

* also available separately

ERGONOMICS AND FUNCTION

Strong in the back

Comfortable seating combines elaborate function and ergonomic aspects. With the further development of our time-tested dorsokinetics, we have implemented a concept that combines both freedom of movement and active support. The flexible element provides mobility for the backrest, allowing it to follow the user and provide support with their every movement.

The backrest with the flexible element offers freedom of movement in all directions.

It follows the most stringent requirements, is state of the art and allows comfortable seating for everyone. With the new office chair standard EN 1335:2020 Type A, se:kit meets the requirements for a diverse user base and their various demands.

Comfortable sitting for all the right reasons

The overall effect of comfortable seating is made up of several parts: In addition to the well thought-out backrest concept, full upholstery or membrane, as well as seat cushions, provide the best comfort. Complemented by an intelligent mechanism and various extras, the sitting experience is now made perfect.

Membrane

The airy, slightly transparent mesh membrane of the backrest is available in five different colours. The front and back differ only in terms of their structure

Full upholstery

The colour and upholstery fabric for the comfortable full upholstery model can be individually selected from the entire Sedus fabric collection. The colour of the back depends on the model colour (see Page 17)

Seat upholstery

For additional seating comfort, the comfort seat with a height of 65 mm is optionally available (standard height: 55 mm).

Sedo-lift III

The robust seat height adjustment (30-year guarantee) is virtually wear-free, even when used by a variety of users. In its lowest position, it ensures soft, back-friendly cushioning when sitting down.

OPTIONS AND ACCESSORIES

The function is in the detail

In addition to its chic look, se:kit stands out due to its modularity and the details that go with it. Many individual elements together become a whole.

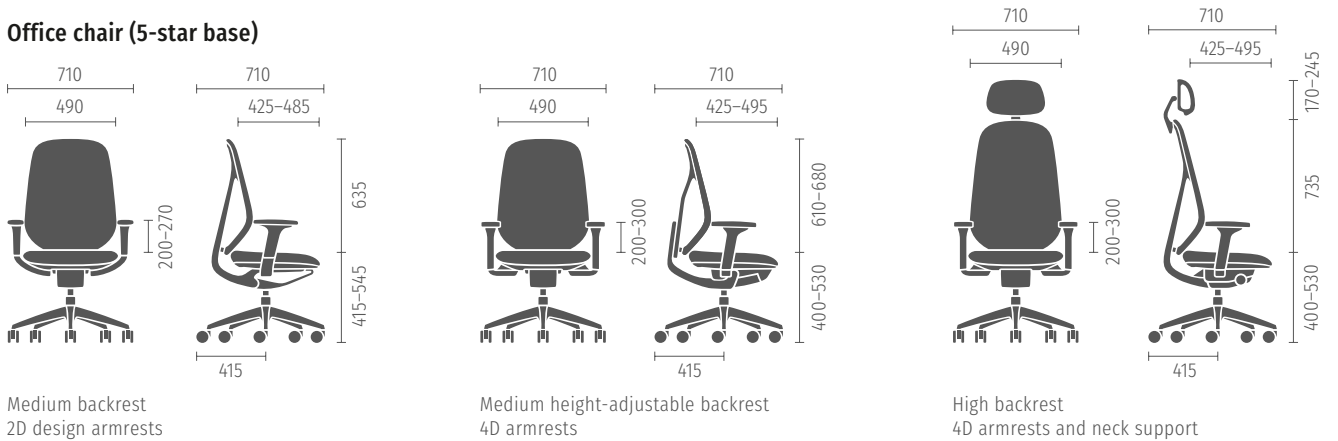

1. The height-adjustable armrests are available in five different designs or, alternatively, users can opt not to have them at all
2. The height-adjustable, swivelling neck support provides relief for the head and neck
3. Keeping the swivel chair in order – with the coat hanger, a jacket or coat can be neatly stowed away
4. The backrest is available in three heights as a membrane or fully upholstered version
5. Mechanism in three versions – to suit individual preferences
6. The matching visitor chair is available with an upholstered or membrane back, with or without armrests, as a cantilever chair or 4-legged frame (with castors or glides)

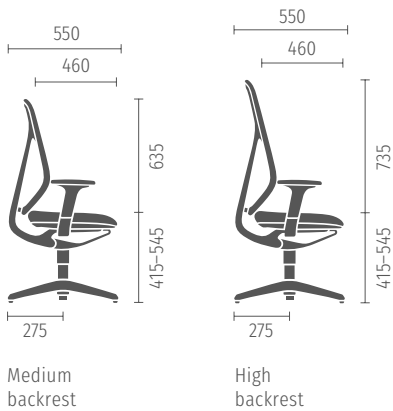

Whether it's an individual workstation, a team workstation at the bench or a meeting room – se:kit can be optimally configured to meet any requirement

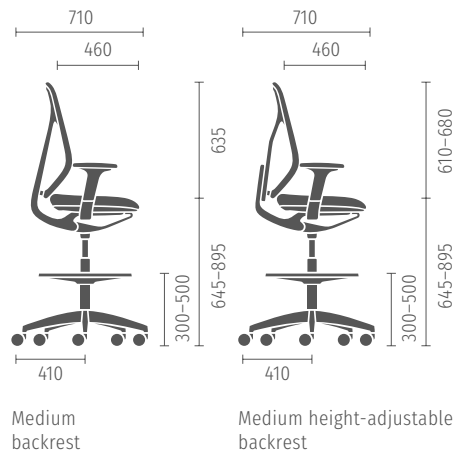

Office chair (5-star base)

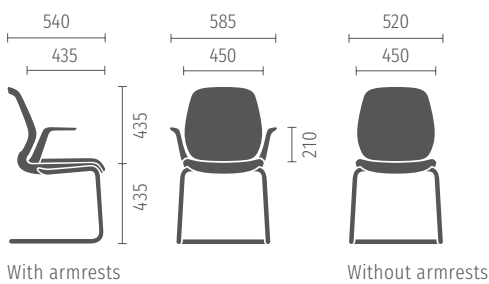

Conference chair (4-star base)

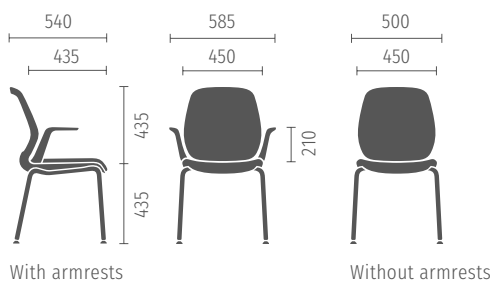

High desk chair (5-star base)

Visitor (cantilever) chair

Visitor chair (4-leg)

VARIATION AND DIVERSITY

Favourite designs for everyone

Due to the mix-and-match character as well as the wide variety of choices, se:kit can be individually configured – so that everyone can have their favourite version.

Model (frame)*

Pale grey

Black

* The colour of the lumbar support and coat hanger dependent on the model colour

Membrane

Light grey

Anthracite

Beige

Melon

Sage

Seat and backrest upholstery

The seat and backrest upholstery are available from the entire Sedus fabric collection. Different covers for the seat and back are possible. The colour of the back upholstery depends on the model colour

Grey

Black

Armrests

- Armrest support, armrest shaft: dependent on the model colour
- Armrest pad: black (exception 2D design armrests: for model colour in pale grey = pad in basalt grey, for model colour in black = pad in black)

Base

Pale grey

Black

Polished aluminium

A stylish detail: the upholstery fabric runs neatly over the edge of the backrest to round off the design

Meaningfully designed

Sedus colour schemes

A harmonious environment contributes significantly to well-being and productivity. Thoughtfully designed furnishings, pleasant material and fabric combinations as well as the choice of colour accents optimally complement the overall appearance. The four colour schemes Smart Balance, Urban Living, Soft Being and Multi Creation can be used to design working environments and suitable se:kit settings.

Smart Balance

structured, technical, functional,
light, reduced, calm

Urban Living

comfortable, respectable, elegant,
urban, intense, timeless

Soft Being

gentle, calm, balanced, natural,
inviting, regenerative

Multi Creation

motivating, inspiring, creative,
dynamic, active, open, free
