Homely

Elegant design, clear lines and state-of-the-art materials are the distinguishing features of the work desk for the home office. The rounded desktop and the privacy screen made of sustainable PET felt enhance the homely character.

Rounded corners, organic design

Two harmonious colour designs

Ergonomic

The motorised height-adjustable desk adapts to the user's working height and thus offers the best ergonomic comfort – whether the user is sitting or standing. The sophisticated technology enables precise adjustment and ensures perfect stability even in the top desk position.

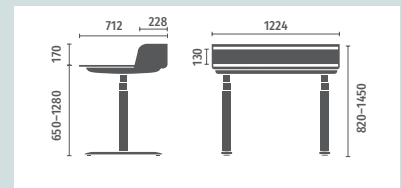

Continuously height-adjustable from 650 to 1280 mm

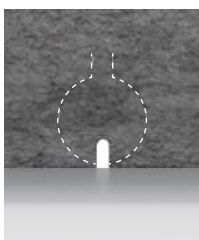

Intuitive control

Compact

Due to its compact dimensions, the desk fits into any room and, at the same time, offers enough space for larger technical installations. The integrated shelf as a second level is ideal for accommodating an additional monitor, for example.

Desktop dimensions: W: 1200 x D: 700 mm
Shelf dimensions: W: 1200 x D: 170 mm

Power and data cabling

All cables can run neatly from the desk via a slot and cable grommet punched into the felt element. Velcro strips or a cable net (280 x 200 mm) is available for organising the cables under the desktop.

Drawers

The optional drawer made of PET felt (to match the privacy screen) with metal housing can be mounted under the desktop. Internal dimensions: 210 x 297 x 70 mm, lockable as an option
